EXPERIENCE

Key Account Analyst at Zenchef Mars 2018 - July 2018
Assistant of the key account manager in a french start-up

- Maintained key accounts' websites and upgraded their looks upon demand
- Gave tutorials to restaurants managers on the Zenchef webapp
- Implemented processes via Re:Dash to monitor how customers use the company's product
- Developed a health score to differentiate the company's power users from the others
- Created an interactive map using Re:Dash for the sales team

Chief Operating Officer at Hustle'ISEP December 2017 - June 2018
Vice president of ISEP's entrepreneurship club

- Organized a "24H Startup Challenge" where students had to come up with a startup idea, probe the market and create a landing page in less than a day
- Recruited a team of 9 people for the club's new season and trained them
- Participated in the 2018 Open Innovation Games for student clubs
- Managed a team of 12 people by organizing team buildings and other activities

Chief Marketing Officer at Hustle'ISEP February 2017 - December 2017
In charge of communication and partnership at ISEP's entrepreneurship club

- Organized a "Startup Week" to discover London's startup ecosystem in 5 days with 30 students
- Managed our different social networks on a regular basis, and created content for it
- Helped students turn their start-up ideas into a solid foundation, making it easier for them to start their entrepreneurial journey
- Created a landing page using a CMS in order to gain credibility in the eyes of future partners
- Organized events to demystify entrepreneurship at our university

Website creation for an Home Automation company Novembre 2016 - February 2017
Answered a bid request made by an Home Automation company at ISEP

- Worked in a team of six people and came up with a website for an home automation company
- Designed the website using basic mockups tools and built it from scratch using HTML, CSS and JavaScript
- Actively participated in the creation of the database for different types of users and sensors in PHP
- Made the link between our website and the sensors' gateway
